Airdale Nursing Home

Extension

Day Room

Sensory Room

Accommodation

Exterior

The Airdale, established in 1988, is a family run nursing home in Bedford. Having had a successful and long association with Dr Kamyar we were happy to be involved with their extension.

Their project in 2010 was to extend the existing building to comprise of 3 storey, 23 bedroom accommodation with new reception, nursing station, underground basement, large lounge, dining room, beauty salon, laundry room and kitchen.

The Wadys team provided:

- Lighting, Emergency Lighting and Power system
- New Addressable Fire Alarm System
- New Data Installation

The outcome provided a fully integrated nursing home that catered for all the needs of residents and care staff. All new systems installed blended into the existing building with ease.

“Wadys has been fantastic in supporting the Airedale’s needs, particularly through a period of considerable expansion for the business. They have been reliable and efficient and I couldn’t have asked for more from them.”

Dr. T Kamyar - The Airdale Nursing Home

Established for over 50 years

Byron House Care Home

Design & Refurbishment

Total value £140K

Wady's have recently completed an extension and refurbishment of Byron House, a 28 bedroom care home located in Aylesbury. Contracted by Saunders Brothers (Bucks) Ltd and in association with Alexander Sedgley Architects, Wady's were tasked with the electrical design and installation of the various systems/installations listed below.

Byron House was designed to promote community and family living in a relaxing and secure environment. Arranged over three floors with a central circular corridor on the lower two floors surrounding comfortable and well-lit day rooms. There are also two dining rooms, cinema room, library, sensory room, therapy salon, garden café and a traditional conservatory with views across the gardens. The garden at the rear offers a sensory garden with complimentary and functional lighting.

The bedrooms each have an en-suite shower room, television, internet and telephone points. There is Wi-Fi access throughout the home.

Our works included the following services:

- Electrical design
- Distribution systems
- Lighting/emergency lighting installation
- Power installation
- Fire alarm system
- Video door entry/access control system
- CCTV system
- Nurse call system
- Data infrastructure
- Terrestrial TV and Satellite system

The care home development for Westgate Healthcare has been nominated for a 2014 design award by Aylesbury Vale District Council.
