

Brackley Town Hall Restoration

Wadys were pleased to work with Borrás Construction to provide the electrical services to this prestigious restoration of the listed Town Hall building.

The new layout now includes a café on the ground floor with the civic hall remaining in the original location on the first floor. A fully equipped kitchen has been included to cater for functions. The second floor (attic space) has been converted into a luxury holiday let.

The outcome was a very high spec bespoke installation that was completed in good time and to suit the clients specific detailed requirements.

The nature of the project posed some interesting and testing challenges with the building fabric being protected at all times.

Our works included the following services:

- Mains distribution
- LED lighting installation
- Emergency lighting installation
- Fire alarm installation
- Intruder & door access control installations
- Data installation
- TV installation
- Lightning protection

Landmark Trust - Historic Buildings

Renovation & Refurbishment

Warden Abbey

Keepers Cottage

The Landmark Trust is a Charity that rescues important buildings that would otherwise be lost and carefully and sensitively restore them. By making them available for holidays, they make sure they can be enjoyed by all, both today and for future generations. They have in their care nearly 200 buildings in Britain and several in Italy and France.

They needed a local Electrical Contractor that could be sensitive to the heritage sites and provide modern systems without ruining the character of the buildings.

Wadys were pleased to have been chosen and have worked with the Landmark Trust for the last 10 years.

Please see page 2 for the list of services we provided.

Castleside - The Panacea Museum

Renovation

Dining room in period style

Clock Tower

Display cabinets

Castleside has been renovated back to its original glory to accommodate a museum for the Panacea Charitable Trust in Bedford.

The project's aim, run by RG Carters, was to install modern systems while visually creating a building of the 1930's using period accessories to match the buildings heritage.

The Wadys team provided:

- Bespoke Display Lighting Systems
- Emergency Lighting running on a central battery
- Rewiring with Fire Proof cabling
- Aspirated Fire Alarm Sytem

The outcome provided a fully functioning property with modern systems without ruining the character of the building.

“Wadys have worked on many projects for RG Carters over the years. Their work being of an excellent quality, helpful and reliable. Castleside was no exception, Wadys performed with their usual proffesionalism, on time and in budget”

Steve Allen - RG Carters
